EDUCATION

University of Michigan

B.S. Mechanical Engineering, Minor in Music. GPA: 3.88.

Ann Arbor, MI
2029

Detroit Catholic Central High School

GPA: 4.5.

2025

EXPERIENCE

Systems Engineering Intern

Wolverine Radar Company

May 2026 – August 2026

Ann Arbor, MI

- Architected a SAR satellite data ordering pipeline now in production, enabling contractors to define geographic watchboxes, place orders, and receive processed satellite imagery
- Migrated and redesigned production database from MySQL to PostgreSQL with PostGIS extension to support geospatial watchbox data, order tracking, job status, and subscription management
- Built automated Python pipeline scripts that trigger on orders, interact directly with satellite API endpoints, and handle SAR data file retrieval and processing
- Developed three full-stack web applications in Next.js and React, including a customer ordering portal, internal job processing dashboard, and company homepage

Player Service Associate

Saint John's Resort

May 2025 – Present

Plymouth, MI

- Greeted and directed players, maintained cart barn and all golf carts, and cleaned clubs and equipment to ensure smooth daily course operations

Honor Caddy

Meadowbrook Country Club

May 2021 – Present

Northville, MI

- Caddied for members, provided on-course assistance including club selection and course management advice, and upheld club standards for service and professionalism

PROJECTS

EECS 183 Elevators Project

C++

- Collaborated on a 4-person team to develop a C++ elevator simulation with AI-based passenger routing logic, optimizing elevator routing to reduce passenger wait time and improve scoring efficiency

Grounded

React Native, Expo, Supabase

- Developing a cross-platform mobile app in React Native and Expo with Mapbox integration for location-based discovery and saving, featuring real-time map rendering and custom marker interactions
- Engineered a Supabase PostgreSQL backend with optimized geospatial queries and seeded database architecture to efficiently surface location results based on user search and proximity

Masters Tournament Bracket Web App <https://mattrex9.github.io/themastersbracket1/>

JavaScript, HTML, CSS

- Built an interactive web application enabling users to select golfers and track performance with real-time scoring
- Integrated ESPN API for live leaderboard updates and optimized UI to reflect live scoring changes efficiently

SKILLS

Languages: Python, JavaScript, C++

Technologies: React, Next.js, React Native, PostgreSQL, PostGIS, SQL, Supabase, Expo, Mapbox

ACTIVITIES & LEADERSHIP

MRacing

Drivetrain Subteam Member

- University of Michigan Formula SAE Team
